

Opt-in Access Codes

To ensure an exclusive group of virtual scratch card campaign participants, consider implementing our new opt-in access code feature.

Players will receive their opt-in code based on the criteria that you determine. Set up custom single-use game access codes manually or upload multiple access codes from an Excel spreadsheet to your game. Each person will need to enter their access code to play your virtual scratch-off game. You can provide a global code or unique codes to your audience and set the access codes to limited or unlimited use.

STEP 1

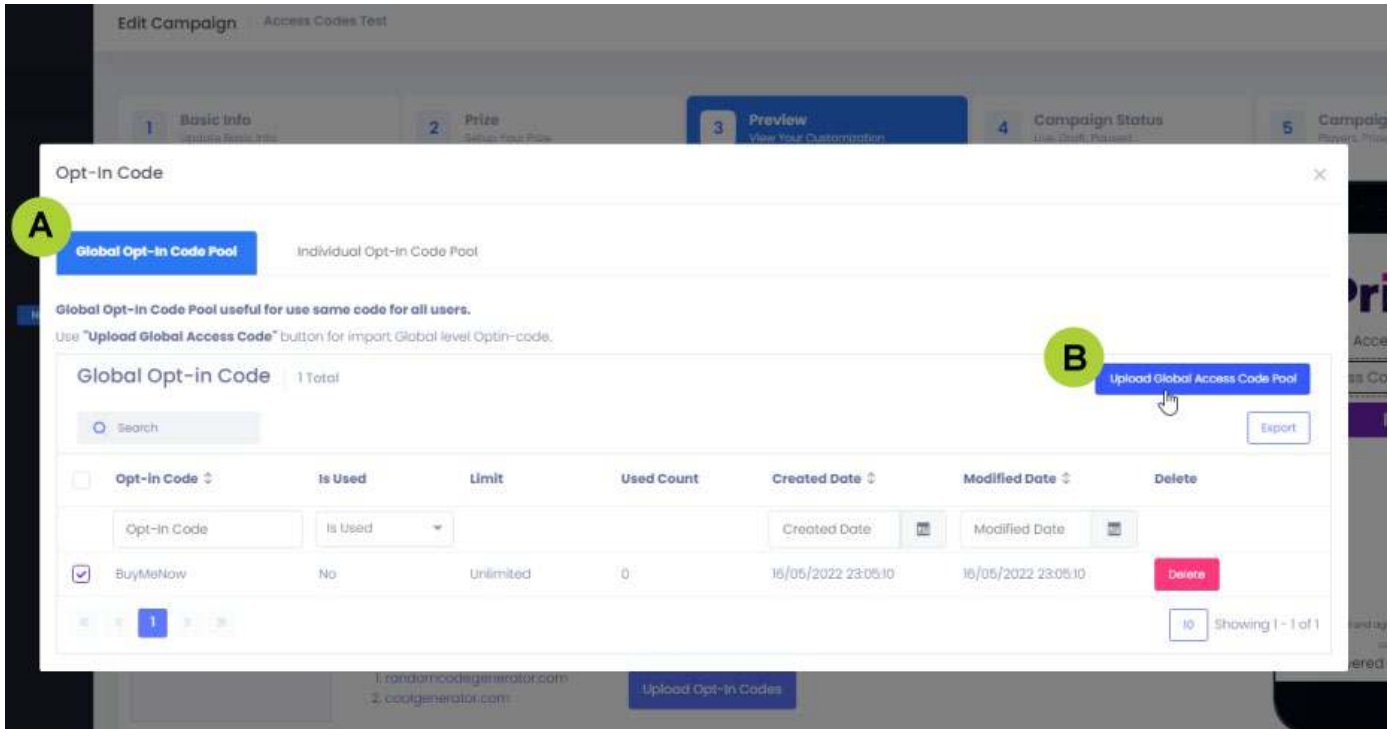

Click **(A) Preview** > **(B) Opt-In** > **(C) Opt-In Code** > **(D) Opt-In Code** to activate the **Opt-In Codes** option. The **(E) Access Code** window will display. Click the blue button **Upload Opt-In Codes**. You can upload code in bulk on an Excel spreadsheet or copy and paste or type codes by hand. If you need a service to generate access codes in bulk, there are **(F)** links to two services that will generate unique codes online that you download in Excel for free.

The screenshot shows the 'Edit Campaign' interface for 'Access Codes Test'. The top navigation bar has five steps: 1. Basic Info, 2. Prize, 3. Preview, 4. Campaign Status, and 5. Campaign Result. The 'Opt-In' menu item is highlighted in blue. The 'Opt-In Code' section is active, showing configuration options for text size, text, height, background color, border color, and border radius. A blue button labeled 'Upload Opt-In Codes' is highlighted with a red box. Below this, there are links to 'randomcodegenerator.com' and 'coolgenerator.com'. A preview of the game screen on the right shows the 'Enter Access Code Below' prompt and a 'Play' button.

STEP 4

If you want to upload access codes on an Excel spreadsheet, follow these steps.

Click **(A) Individual Opt-in Code Pool**, then click **(B) Upload Individual Access Code Pool**

Opt-In Code

Global Opt-In Code Pool **Individual Opt-In Code Pool** **A**

The Individual/Unique Opt-in Code is useful for using a different code for individual user(s).
Once a code is used no other user can play with the same opt-in code again.
Upload Individual Access Code Pool button for importing individual level Opt-in Codes.

Individual Opt-In Code | 602 Total

Search **Upload Individual Access Code Pool** **B** Export

Opt-In Code	Is Used	Created Date	Modified Date	Delete
-------------	---------	--------------	---------------	--------

Showing 1 - 10 of 602

Cont'd

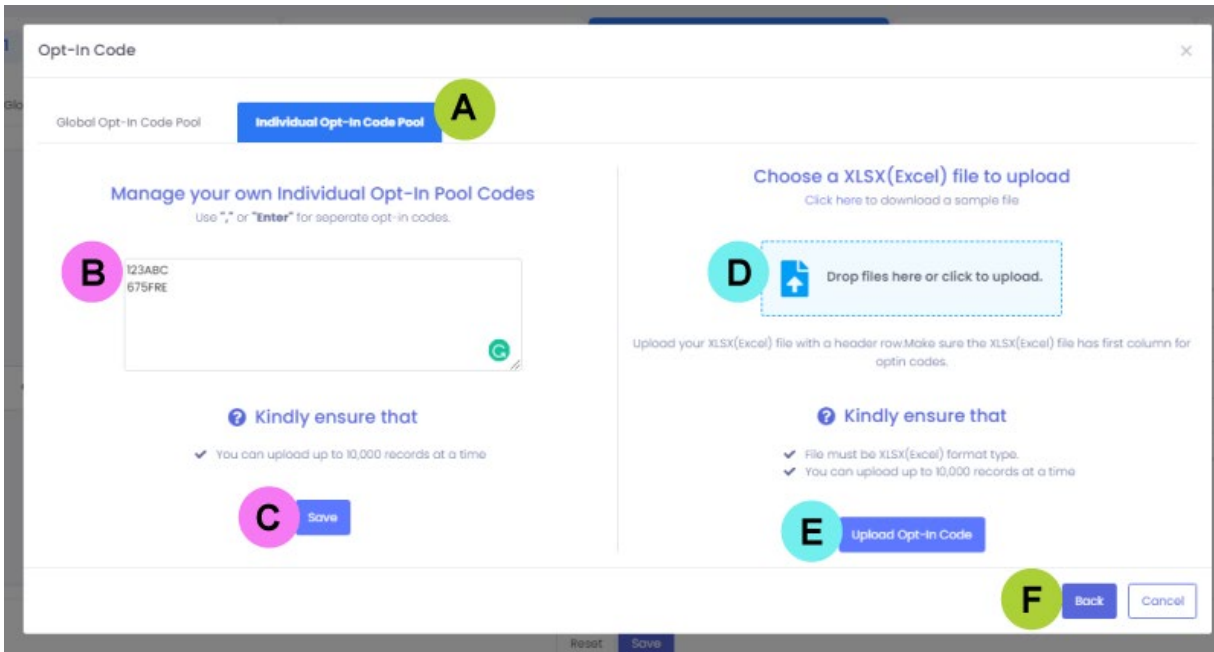

STEP 5

If you want to upload access codes on an Excel spreadsheet, follow these steps.

There are two options to choose from: **(B) Type in access codes manually, or copy and paste** from a Word, Notepad, or Excel document > then click **(C) Save** > and click **(F) Back** to leave the page.

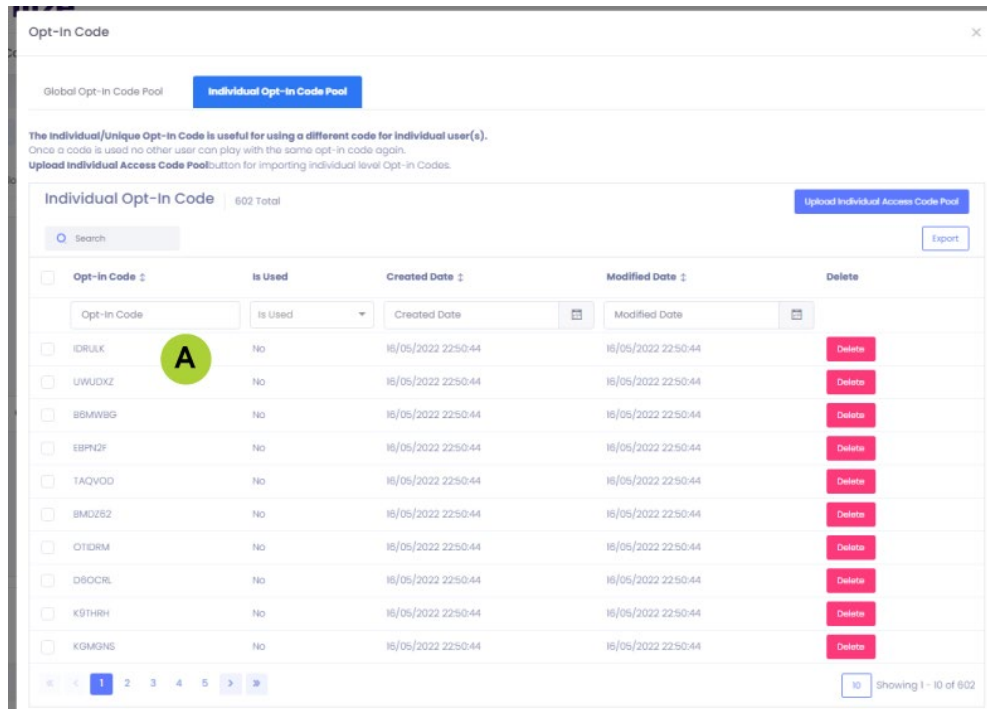

Or

Bulk upload access codes on an Excel doc in **(D) Drop files here or click to upload** box > click **(E) Upload Opt-in Code** and click **(F) Back** to leave the page.

Cont'd

Your uploaded codes will appear on the (A) Individual Opt-in Code Pool page
